Safe sealing for high standards

WeLoc® Gripper

The power closing tool

Reusable

WeLoc Gripper – Sack Clip

“Why waste when you can save”

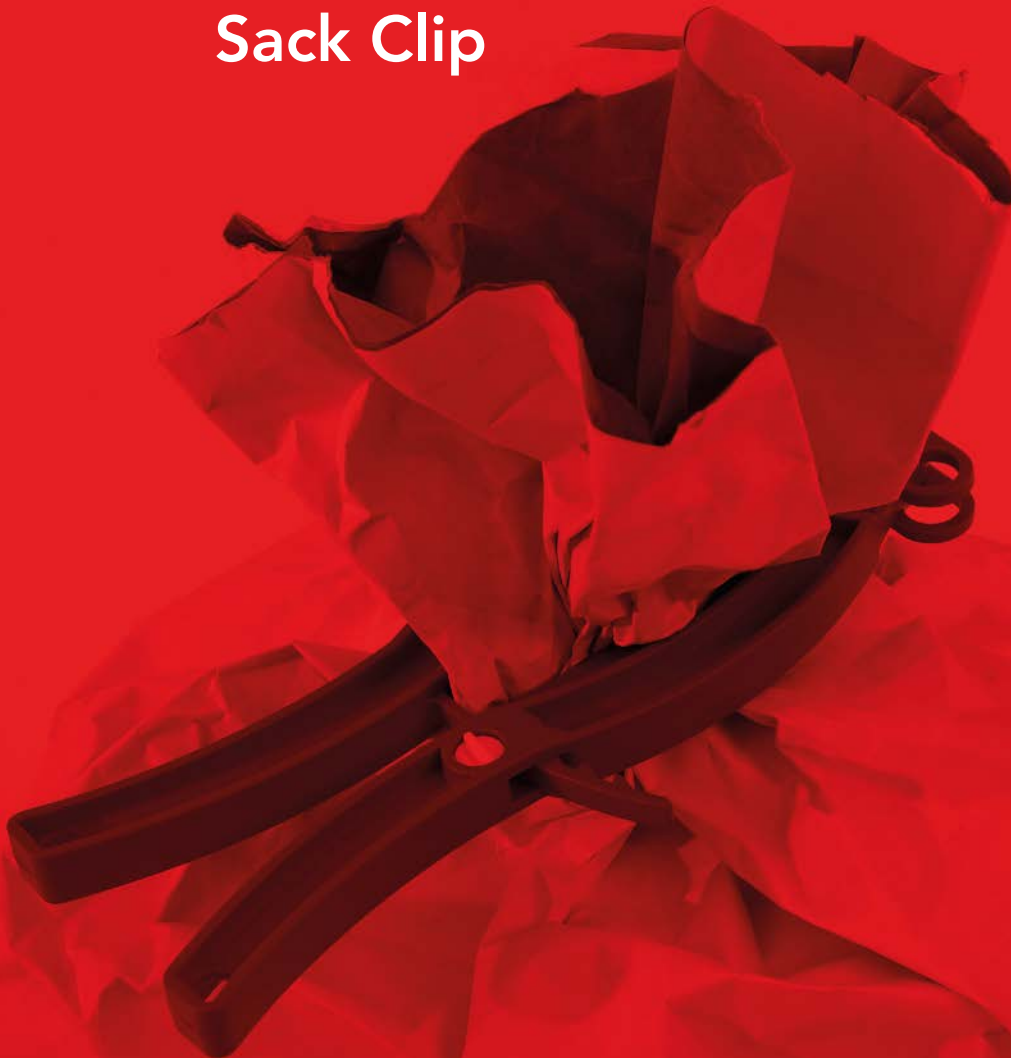

WeLoc Gripper is a convenient tool for closing and reclosing sacks and big bags. The plastic sack clip can be used to secure bags with almost all ingredients to maintain quality standards, reduce waste and avoid cross-contamination.

WeLoc Gripper can also be used to reseal the packages in the home or elsewhere for easy and effective containment. WeLoc Gripper is the cost-effective quality solution which can be used repeatedly for years to come. It is made from polyamide, reinforced with fiberglass for maximum stiffness and long life durability in the most demanding environments.

The rotatable locking button on the clip provides additional security to fulfil demands in tough environments like pharmaceutical and industrial production. It is easy to keep partly-used raw materials safe and secure with WeLoc Gripper. To ensure the cleanliness the clip can easily be sterilized in for example an autoclave for hospital and laboratory applications.

Made in Sweden

WeLoc design and manufacture Swedish, innovative plastic closures that meet your needs – today and in the future. We have a WeLoc for any application. If not we will design a new for you.

Production takes place at our sister company Weland Plastic a stone's throw away from our site. Weland Plastic is certified according to IATF 16949 and certified according to ISO 14001. Our plastic closures are ideal for food, medical industry, pet-food and as a giveaway to promote your brand. At WeLoc we put you, the customer in focus, wherever you are in the world. We offer fast, reliable deliveries by truck, air, sea or parcel.

In 1983 the family company Weland developed and started producing plastic clips in the small village Smålandsstenar. Innovation, function and quality are always significant for WeLoc. Our history is always the platform and we are proud to be a part of our Swedish tradition. We are a global active company but all our design and manufacturing are in Smålandsstenar.

Sweden is a country characterized by democracy, innovation and resourcefulness. A place where decent working conditions, Swedish quality and innovation are the focus. In the heart of Sweden is a company that still cares about the Swedish standard – the family business WeLoc.

WeLoc® Gripper FD

Fully detectable power closing tool

Detectable

WeLoc Gripper FD – Sack Clip

Secure & Detectable Closing

WeLoc Gripper FD is a Fully Detectable sack and big bag clip developed for use where systems for Metal- or X-ray detection are in operation. The clip is made from a special fully detectable acetal material.

WeLoc Detectable is strong and durable with a long life. It is ideal for use in the food, beverage and pharmaceutical sector.

By using the clip manufacturers reduce the risk of contamination from foreign particles. Their use minimizes the risk of injury to consumers, helps to avoid damage to production equipment, prevent product recalls and harm to reputation.

The clip is ideal for reclosing bags of raw materials. WeLoc Detectable is designed for use in the most demanding situations. The rotatable locking button on the clip provides extra security. The clip incorporates special polymers with evenly dispersed additives that make every part of the closure fully detectable. Detectable comes in dark blue coloring, common standard for detectable products.
